PROJECTS

Personal Portfolio website Using Angular

Personal portfolio website using Angular, showcasing my skills and projects. Integrated engaging animation effects with the AOS library for a dynamic user experience and saving form data using Formspre

Food Ordering Website Using Angular

Website is made using angular. 🌟 Key Features (for now): 🛒 Add to Cart: Easily select and add your favorite dishes to your cart, making ordering a breeze. 🔍 Food Search: Quickly find the cuisine or dish you are craving for a delightful dining experience.

Blog website using Mean Stack

The backend, built on Express and NodeJS, ensures secure user management and data storage in MongoDB. Angular on the frontend delivers a dynamic article platform with engaging features, static pages for information, and an upcoming Admin Panel for enhanced control.

Simple portfolio website using pure Html &Css

Made during initial stage of learning.a fully responsive website using pure HTML and CSS. Implemented form input acceptance through Formspre for seamless data collection.

WORKSHOP & CERTIFICATIONS

Angular (Basics) Certification from Hackerrank

Css (Basics) Certification from Hackerrank
